# INDEX TO VOLUME 21—1986

## Index to Authors and Contributors

ADEYEFA, B. A. *Paper* Loads, stresses, and deflections in bicycle frames, 185
AINSWORTH, R. A. *Paper* An assessment of the effects of pre-strain on upper shelf fracture toughness, 219
ASUNDI, A. *Research Note* Moire interferometry for out-of-plane displacement measurement, 51

BENCKERT, L. *Paper* Measurement of residual deformations in butt-welded plates by use of the white light speckle technique, 243

CARMICHAEL, G. D. T. *Paper* Finite element stress analysis of an equal diameter branch pipe intersection subjected to out-of-plane and twisting moments, 9
CHEUNG, M. T. *Research Note* Moire interferometry for out-of-plane displacement measurement, 51
COOPER, N. R. *Paper* Probability of failure calculations and confidence band estimates for an annular brittle disc fractured under centrifugal loading, 121

DANIELS, M. J. *Paper* Enhancing finite element boundary stress predictions for plane and axisymmetrical situations, 33
DRAGONI, E. *Paper* Analysis of a split ring inserted into a circular housing, 59

FENNER, R. T. *Paper* A quadratic formulation for two-dimensional elastoplastic analysis using the boundary integral equation method, 159

GOOCH, D. J. *Paper* $C^*$ correlations for creep crack growth in weld metals, 231
GROVES, A. *Paper* Nomographic design procedures for fibre-reinforced metallic rocket motor cases, 145

HARTLEY, P. *Paper* Non-linear finite-element analysis on microcomputers for metal forging, 197
HAYHURST, D. R. *Paper* Design – development of a variable load tension – compression creep testing machine, 25
HUI, D. *Paper* Viscoelastic response of floating ice plates under distributed or concentrated loads, 135
HUMBLE, S. *Paper* Probability of failure calculations and confidence band estimates for an annular brittle disc fractured under centrifugal loading, 121
HUSSIN, A. A. M. *Paper* Non-linear finite-element analysis of microcomputers for metal forging, 197
HYDE, T. H. *Papers* Use of the reference stress concept to assess the effect of crack growth increment size on the accuracy of creep crack growth predictions, 109. Stresses in swivel ring flanges due to pressure loading, 225. *Research Note* Estimates of the creep parameter $C^*$ in terms of reference stress, 117

JONSSON, M. *Paper* Measurements of residual deformations in butt-welded plates by use of the white light speckle technique, 243

KATO, A. *Paper* Design formula for grooved shafts under torsion, 205
KENDRICK, S. *Paper* The behaviour of a horizontal vessel on loose saddles – a buckling assessment of the support region, 45
KENNY, B. *Papers* A modification to the theory for load distribution in conventional nuts and bolts, 17. The optimization of the design of nuts with partly tapered threads, 77
KIMMINS, S. T. *Paper* $C^*$ correlations for creep crack growth in weld metals, 231
KIRKWOOD, M. G. *Paper* Finite element stress analysis of an equal diameter branch pipe intersection subjected to out-of-plane and twisting moments, 9

LEE, K. H. *Paper* A quadratic formulation for two-dimensional elastoplastic analysis using the boundary integral equation method, 159
LI WEIJI, *Paper* Optimisation of stiffened panels under compression, 153
LOW, K. C. *Paper* Use of the reference stress concept to assess the effect of crack growth increment size on the accuracy of creep crack growth predictions, 109

MARGETSON, J. *Papers* Probability of failure calculations and confidence band estimates for an annular brittle disc fractured under centrifugal loading, 121. Nomographic design procedures for fibre-reinforced metallic rocket motor cases, 145
MARSDEN, B. J. *Paper* Stresses in swivel ring flanges due to pressure loading, 225
MILLAR, M. A. *Paper* Loads, stresses, and deflections in bicycle frames, 185
MOFFATT, D. G. *Paper* Finite element stress analysis of an equal diameter branch pipe intersection subjected to out-of-plane and twisting moments, 9
MORETON, D. N. *Paper* Ratchetting rates for a Bree cylinder subjected to in-phase and out-of-phase loading, 1
MORRISON, C. J. *Paper* Design – development of a variable load tension – compression creep testing machine, 25

NG, H. W. *Paper* Ratchetting rates for a Bree cylinder subjected to in-phase and out-of-phase loading, 1

PATTERSON, E. A. *Papers* A modification to the theory for load distribution in conventional nuts and bolts, 17. The optimisation of the design of nuts with partly tapered threads, 77
PRAYOONRAT, S. *Paper* A computerised design aid for drive shafts with some fatigue considerations, 85
PULLE, D. W. J. *Paper* Crack length measurement: analysis of the electropotential method using a finite element method, 127

RHODES, J. *Paper* Microcomputer design analysis of plate post-buckling behaviour, 71
RICHARDS, T. H. *Paper* Enhancing finite element boundary stress predictions for plane and axisymmetrical situations, 33
ROSSMANITH, H. P. *Paper* Dynamic photoelastic investigation of wave propagation and energy transfer across contacts, 213
ROWE, C. W. *Paper* Non-linear finite-element analysis on microcomputers for metal forging, 197

SHUKLA, A. *Paper* Dynamic photoelastic investigation of wave propagation and energy transfer across contacts, 213
SODEN, P. D. *Paper* Loads, stresses, and deflections in bicycle frames, 185
SPENCE, J. *Conference Report* A report on the Applied Solid Mechanics Conference held in Glasgow on 26/27 March 1985, 55
STANLEY, P. *Paper* Nomographic design procedures for fibre-reinforced metallic rocket motor cases, 145
STROZZI, A. *Paper* Analysis of a split ring inserted into a circular housing, 59
STURGESS, C. E. N. *Paper* Non-linear finite-element analysis on microcomputers for metal forging, 197
SWEENEY, J. *Paper* Finite-width correction factors for SEN testing of orthotropic materials in opening mode, 99

TAN, C. L. *Paper* Stress redistribution in thick-walled cylinders due to the introduction of a cross-bore after autofrettage, 177
TOOTH, A. S. *Paper* The behaviour of a horizontal vessel on loose saddles – a buckling assessment of the support region, 45. *Conference Report* A report on the Applied Solid Mechanics Conference held in Glasgow on 26/27 March 1985, 55

WALTON, D. *Paper* A computerised design aid for drive shafts with some fatigue considerations, 85
WONG, Y. S. *Paper* Loads, stresses, and deflections in bicycle frames, 185

# Subject Index

A COMPUTERISED DESIGN AID FOR DRIVE SHAFTS WITH SOME FATIGUE CONSIDERATIONS, *Paper*, 85
A MODIFICATION TO THE THEORY FOR LOAD DISTRIBUTION IN CONVENTIONAL NUTS AND BOLTS, *Paper*, 17
A QUADRATIC FORMULATION FOR TWO-DIMENSIONAL ELASTOPLASTIC ANALYSIS USING THE BOUNDARY INTEGRAL METHOD, *Paper*, 159
A REPORT ON THE APPLIED SOLID MECHANICS CONFERENCE HELD IN GLASGOW ON 26/27 MARCH 1985, *Conference Report*, 55
AN ASSESSMENT OF THE EFFECTS OF PRESTRAIN ON UPPER SHELF FRACTURE TOUGHNESS, *Paper*, 219
ANALYSIS OF A SPLIT RING INSERTED INTO A CIRCULAR HOUSING, *Paper*, 59
Annular brittle disc fractured under centrifugal loading, probability of failure calculations and confidence band estimates for , 121
Applied Solid Mechanics, Conference on, Glasgow 26/27 March 1985, 55
Autofrettage, 177

Behaviour of a horizontal vessel on loose saddles, 45
Bicycle frames, loads, stresses, and deflections in, 185
Bolts, conventional, 17
Boundary integral equation method, 159
Boundary stress, finite element predictions, 33
Branch pipe intersection, equal diameter, 9
Bree cylinder, 1
Brittle disc, annular, 121
Buckling assessment of the support region of a horizontal vessel on loose saddles, 45
Butt-welded plates, residual deformations in, 243

*C**, 117, 231
*C** CORRELATIONS FOR CREEP CRACK GROWTH IN WELD METALS, *Paper*, 231
Centrifugal loading, annular brittle disc fractured under, 121
Compression, stiffened panels under, 153
Computerised design aid for drive shafts with some fatigue considerations, 85
Confidence band estimates, 121
Contacts, 213
Crack growth, 109, 231
Crack length measurement, 127
CRACK LENGTH MEASUREMENT: ANALYSIS OF THE ELECTROPOTENTIAL METHOD USING A FINITE ELEMENT METHOD, *Paper*, 127
Creep crack growth, 231
  predictions, accuracy of, 109
Creep testing machine, 25
Cross-bore, introduction of, into a thick-walled cylinder after autofrettage, 177
Cylinder, Bree, 1
Cylinders, thick-walled, 177

Deformations, residual, 243
Design aid for drive shafts, computerised, 85
Design analysis of plate post-buckling behaviour using a microcomputer, 71
DESIGN – DEVELOPMENT OF A VARIABLE LOAD TENSION – COMPRESSION CREEP TESTING MACHINE, *Paper*, 25 DESIGN FORMULAS FOR GROOVED SHAFTS UNDER TORSION, *Paper*, 205
Design of nuts with partly tapered threads, optimisation of, 77
Design procedures, nomographic, 145
Displacement measurement, out-of-phase, 51
Drive shafts, computerised design aid for, 85
DYNAMIC PHOTOELASTIC INVESTIGATION OF WAVE PROPAGATION AND ENERGY TRANSFER ACROSS CONTACTS, *Paper*, 213

Elastoplastic analysis, two-dimensional, 159
Electropotential method for crack length measurement, analysis of, 127
Energy transfer, 213
ENHANCING FINITE ELEMENT BOUNDARY STRESS PREDICTIONS FOR PLANE AND AXISYMMETRICAL SITUATIONS, *Paper*, 33
Equal diameter branch pipe intersection, 9
ESTIMATES OF THE CREEP PARAMETER *C** IN TERMS OF REFERENCE STRESS, *Research Note*, 117

Failure calculations, 121
Fibre-reinforced metallic rocket motor cases, nomographic design procedures for, 145
Finite element analysis, non-linear, 197
FINITE ELEMENT ANALYSIS OF AN EQUAL DIAMETER BRANCH PIPE INTERSECTION SUBJECTED TO OUT-OF-PLANE AND TWISTING MOMENTS, *Paper*, 9
Finite element boundary stress predictions for plane and axisymmetrical situations, 33
Finite element method, analysis of electropotential method for crack length measurement using, 127
FINITE WIDTH CORRECTION FACTORS FOR SEN TESTING OF ORTHOTROPIC MATERIALS IN OPENING MODE, *Paper*, 99
Flanges, swivel ring, 225
Fracture toughness, upper shelf, 219

Grooved shafts under torsion, design formulas for, 205

Horizontal vessel on loose saddles, behaviour of, 45

Ice plates, floating, viscoelastic response of, under distributed or concentrated loads, 135

Load distribution, a modification to the theory for, in conventional nuts and bolts, 17
Loading:
  in-plane and out-of-plane, 1
  pressure, 225
LOADS, STRESSES, AND DEFLECTIONS IN BICYCLE FRAMES, 185
Loose saddles, behaviour of a horizontal vessel on, 45

MEASUREMENT OF RESIDUAL DEFORMATIONS IN BUTT-WELDED PLATES BY USE OF THE WHITE LIGHT SPECKLE TECHNIQUE, *Paper*, 243
Metal forging, 197
Metallic rocket motor cases, fibre reinforced, 145
MICROCOMPUTER DESIGN ANALYSIS OF PLATE POST-BUCKLING BEHAVIOUR, *Paper*, 71
Microcomputers, non-linear finite-element analysis on, 197
Moire interferometry, 51
MOIRE INTERFEROMETRY FOR OUT-OF-PLANE DISPLACEMENT MEASUREMENT, *Research Note*, 51

NOMOGRAPHIC DESIGN PROCEDURES FOR FIBRE-REINFORCED METALLIC ROCKET MOTOR CASES, *Paper*, 145
NON-LINEAR FINITE-ELEMENT ANALYSIS ON MICROCOMPUTERS FOR METAL FORGING, *Paper*, 197
Nuts:
  conventional, 17
  with partly tapered threads, 77

Opening mode, orthotropic materials in, 99
OPTIMISATION OF STIFFENED PANELS UNDER COMPRESSION, *Paper*, 153
Optimisation of the design of nuts with partly tapered threads, 77
Orthotropic materials in opening mode, SEN testing of, 99
Out-of-plane displacement measurement, 51

Partly tapered threads, nuts with, 77
Photoelastic investigation, dynamic, 213
Plate post-buckling behaviour design analysis of, 71
Plates, butt-welded, 243
Post-buckling behaviour, plate, 71
Pressure loading stresses in swivel ring flanges due to, 225

Pre-strain, effects of, on upper shelf fracture toughness, 219
PROBABILITY OF FAILURE CALCULATIONS AND CONFIDENCE BAND ESTIMATES FOR AN ANNULAR BRITTLE DISC FRACTURED UNDER CENTRIFUGAL LOADING, *Paper*, 121

Quadratic formulation for two-dimensional elastoplastic analysis using the boundary integral equation method, 159

RATCHETTING RATES FOR A BREE CYLINDER SUBJECTED TO IN-PHASE AND OUT-OF-PHASE LOADING, *Paper*, 1
Reference stress, 109, 117
Reference stress concept, use of, to assess the effect of crack growth increment size on the accuracy of creep crack growth predictions, 109
Residual deformations, measurement of, in butt-welded plates, 243
Rocket motor case, fibre-reinforced metallic, 145

SEN testing of orthotropic materials in opening mode, finite-width correction factors for, 99
Shafts, grooved, 205
Split ring inserted into a circular housing, analysis of, 59
Stiffened panels under compression, optimisation of, 153
STRESS REDISTRIBUTIONS IN THICK-WALLED CYLINDERS DUE TO THE INTRODUCTION OF A CROSS-BORE AFTER AUTOFRETTAGE, *Paper*, 177
STRESSES IN SWIVEL RING FLANGES DUE TO PRESSURE LOADING, *Paper*, 225
Swivel ring flanges, 225

Tension – compression creep testing machine, variable load, 25
THE BEHAVIOUR OF A HORIZONTAL VESSEL ON LOOSE SADDLES – A BUCKLING ASSESSMENT OF THE SUPPORT REGION, *Paper*, 45
THE OPTIMISATION OF THE DESIGN OF NUTS WITH PARTLY TAPERED THREADS, *Paper*, 77
Theory for load distribution in conventional nuts and bolts, 17
Thick-walled cylinders, stress redistributions in, 177
Torsion, grooved shafts under, 205
Two-dimensional elastoplastic analysis using the boundary integral equation method, 159

Upper shelf fracture toughness, effects of pre-strain on, 219
USE OF THE REFERENCE STRESS CONCEPT TO ASSESS THE EFFECT OF CRACK GROWTH INCREMENT SIZE ON THE ACCURACY OF CREEP CRACK GROWTH PREDICTIONS, *Paper*, 109

Variable load tension – compression creep testing machine, design – development of, 25
VISCOELASTIC RESPONSE OF FLOATING ICE PLATES UNDER DISTRIBUTED OR CONCENTRATED LOADS, *Paper*, 135

Wave propagation, 213
Weld metals, $C^*$ correlations for creep crack growth in, 231
White light speckle technique, 243
